Professional Summary

Results-driven Software Engineer with 3+ years of experience designing, building, and optimizing scalable web and AI-powered applications. Proficient in backend development, API design, and data-driven automation systems. Skilled in Django, FastAPI, PostgreSQL, and cloud-based deployment with Docker and AWS. Delivered impactful solutions in health informatics and SaaS, serving over 600 users globally. Passionate about crafting clean, efficient architectures and contributing to collaborative engineering teams.

Core Technical Skills

- Languages: Python (core), JavaScript/TypeScript, Java, C++, Go, PHP
- Backend: Django, Django REST Framework, FastAPI
- Frontend: Next.js, React, TailwindCSS, shadcn, Bootstrap, HTML5, CSS3
- Databases: PostgreSQL, MySQL, SQLite, MongoDB, Turso
- DevOps & Infra: Docker, GitHub Actions (CI/CD), AWS (EC2, S3), Kubernetes (familiar)
- APIs & Integrations: RESTful API design, 3rd-party integrations (OpenAI, LangChain etc)
- Data & Analytics: Pandas, NumPy, Web scraping (Selenium, BeautifulSoup), workflow automation with n8n
- Collaboration Tools: Git, GitHub, JIRA, Agile/Scrum

Professional Experience

Software Engineer | CBAMESTIMATOR GmbH, Germany (2024 – 2025)

- Designed and deployed scalable backend solutions using Django & FastAPI.
- Built and maintained RESTful APIs to support client-facing applications.
- Automated business processes including lead generation and email campaigns, reducing manual effort by 60% and improving efficiency.
- Developed and maintained PostgreSQL and MongoDB databases to optimize data performance.
- Delivered dashboards and data import modules enhancing user experience for 600+ users.

Health Information Officer | Ghana Health Service, Accra (2021 – 2024)

- Managed regional health data systems (DHIMS2), ensuring data accuracy and consistency.
- Developed digital data collection tools (ODK, Kobo Collect, Google Forms) to improve field data capture.
- Conducted data audits and KPI analytics to inform strategic decisions for the Greater Accra Regional Health Directorate.
- Trained over 500 staff in data analysis and visualization techniques.

Selected Projects

LeadsRanc – Django REST + postgres + Next.js + celery

Built a leads finding platform (Beta test) that helps businesses find ideal B2B leads with verified emails for better deliverability. Live Demo: <https://leadsranc.com>

Holistic Assessment Web App – Django REST + Next.js + PostgreSQL

Automated performance scoring for 500+ health facilities across Ghana Health Service, integrating DHIMS2 API to reduce manual data entry errors by 70%. Live Demo: <https://holistic-assessment.vercel.app/>

Chat-Wise AI – Django REST Framework, Next.js, OpenAI API

Developed an AI-powered chatbot platform enabling users to create, train, and deploy custom assistants for support and lead management. Live Demo: <https://chatwise-ai.vercel.app/>

Health-Information AI – Django REST + LangChain + Next.js

Built an AI assistant for verified SOP access and knowledge retrieval by health professionals, improving information accessibility. Live Demo: <https://healthinformationai.vercel.app/>

Education

BSc, Computer Science – Ghana Communication Technology University (Expected 2026)

Diploma, Health Information Management – College of Health & Well Being (2018 – 2021)

Software Engineering Program – Africa Leadership University (2022 – 2024)

Additional Experience & Tools

- Business Intelligence: Power BI, Python-based analytics, and visualization.
- Research: Contributed to multiple public health and data-driven research projects.
- Cloud/Automation: Implemented CI/CD pipelines and lightweight Dockerized deployments.

I have incredible ability to easily pick up new technologies and languages to get the work done with precision and efficiency.
